NEW CISF HEADQUARTERS FOUNDATION LAID IN NEW DELHI

CISF Ready for Hybrid Threats Amid Evolving Security Challenges: DG

Our Political Bureau

New Delhi: CISF Director General Praveer Ranjan on Monday highlighted the evolving nature of security challenges and the force's preparedness to address emerging threats. He said modern security concerns increasingly involve hybrid threats such as cyber attacks, digital sabotage, drones and other technology-driven risks. Ranjan

was speaking at the foundation stone laying function of the new CISF headquarters at CGO complex at Lodhi Road by minister of state Bandi Sanjay Kumar.

Ranjan informed that CISF has been entrusted with several new responsibilities by the Ministry of Home Affairs in recent years. The DG highlighted that CISF has been designated as a Recognised Security Organisation under the Interna-

tional Ship and Port Facility Security Code, enabling it to undertake security audits and assessments of major ports and contribute to securing India's growing Blue Economy.

Ranjan noted that the CISF has assumed security responsibilities at high-security correctional facilities in Jammu & Kashmir and is expanding its role in internal security management.
